

A Visiting Research Specialist position is available in the Innate Immunology Laboratory of Dr. Kiwook Kim ([kiwook@uic.edu](mailto:kiwook@uic.edu)) at the Department of Pharmacology, College of Medicine, University of Illinois at Chicago (UIC).

We are looking for a highly motivated and committed researcher in the field of immunology with good academic/research background in cell biology and immunity. The Kim Lab studies the development, plasticity and *in vivo* functions of macrophages using lineage tracing systems, genetic cell ablation and adoptive cell transfer approaches.

Duties include:

- Assist the principle investigator and other research staff with experimental sample preparation and collection.
- reagent preparation
- handling animals
- antibody staining tissues/cells for fluorescence imaging
- cutting tissue slides for histology
- counting cells
- performing data acquisition
- maintain detailed records of all experiments
- prepare collected data for presentation

The candidate should have:

Bachelor's degree in science or related field required. Master's degree in science preferred. A minimum of 3 years related research experience is required.

Interested and qualified candidate should send a cover letter describing his/her research interest, up-to-date curriculum vitae including the list of publications and contact information of three referees to [kiwook@uic.edu](mailto:kiwook@uic.edu). For fullest consideration, apply to the link <https://jobs.uic.edu/job-board/job-details?jobID=124308>

University of Illinois at Chicago is an Equal Opportunity, Affirmative Action employer. Minorities, women, veterans and individuals with disabilities are encouraged to apply. University of Illinois conducts background checks on all job candidates upon acceptance of contingent offer of employment. Background checks will be performed in compliance with the Fair Credit Reporting Act.
