

Visiting Research Specialist in RNA Research

We have an opening for a Visiting Research Specialist in RNA research and functional genomics. The researcher will study RNA expression, especially in the context of cancer development and stem cell biology. We are particularly interested in combining bioinformatics, high-throughput biology such as RNA-seq and single cell sequencing, as well as standard molecular biology techniques to characterize the functions of microRNA and other RNA species. Our lab is also interested in using RNA expression profiles as molecular biomarkers for disease diagnosis and prognosis.

This position requires B.S or M.S. in molecular biology, cell biology, genetics, biochemistry or related fields. The candidates should have prior experience in molecular and cell biology. Experience in bioinformatics, biostatistics or computer science is also a plus. A minimum of 3 years related research experience. Possesses and applies comprehensive knowledge of research principles, concepts, practices and methods. Proficient in specific lab research techniques.
